- Advanced Firewall and Gateway features
- Intuitive web-based configuration

Dual SIM Digi WR series HSPA+ router

The Digi TransPort WR family of cellular routers offers an all-in-one mobile communications solution with true enterprise class routing, security and firewall. These multifunction cellular routers feature a flexible design with optional integrated Wi-Fi access point (with multi SSID) / Client, USB, serial and 1-, 2- or 4-port Ethernet switch. Additional configuration options include multiple serial ports (async or sync), GPS or telemetry I/O.

The Digi TransPort family offers an advanced routing, security and firewall feature set including stateful inspection firewall and integrated VPN. Enterprise class protocols incorporate BGP, OSPF and VRRP+, a patented technology built upon the popular VRRP failover standard providing true auto-sensing, auto-failure and auto-recovery of any line drop.

Management software options include Digi Remote Manager and iDigi Manager Pro™.

Combine the 3G router with our Internet service selector

Select VSAT, Fleet Broadband, 3G, or WiFi connection: Manual or automatic connection through load balancing, link aggregation, and automatic failover across multiple Internet links. Provides simple and cost-effective solutions that assure high Internet connection performance and availability.
