

## New offices for MNS

MNS (Maritime Network Systems SL), the Superyacht telecom solution provider, celebrate 8 years on Mallorca. At the same time, we have moved into brand new offices in the Santa Ponsa industrial area of Son Bugadellas, located directly above *Fine Cars Europe*.

The move has been necessary due to our current expansion.

MNS would like to thank everyone who has contributed to our accomplishments, and we welcome all customers, existing and new, to our offices in Son Bugadellas.

MNS can look back on 8 years of experience, work development and innovative projects. Our history started with Marine VSAT in 2000, and MNS have since become a part of the GIS (General Industry Systems) group.

We are the Superyacht division of GIS, specializing in telecom solutions for Superyachts, in addition to being their VSAT service representative for southern Europe and Middle East. MNS are installing and servicing Marine VSAT installations on cruise ships, yachts and offshore vessels worldwide.

**new address for MNS:**

Calle Islas Baleares 20 · 1º  
07183 Son Bugadellas  
Santa Ponsa  
Mallorca  
Spain

**New telephone number: (+34) 971 10 56 57**

**New fax number: (+34) 971 69 15 66**

**MNS direct line through main office switchboard in Norway: +47 51 11 33 22**

The Son Bugadellas industrial estate has become highly popular for companies in the marine industry on Mallorca. It is easily reached from Palma, Portals, Port Adriano and Andratx, and the traffic congestion and parking problems of the Palma industrial areas are absent.

**8 years on Mallorca!**

## MNS - telecom news

### new vsat antenna from sail or

Leading satellite equipment manufacturer Thrane & Thrane makes its first step into the VSAT arena with the introduction of a maritime VSAT solution and network in February 2009.

With fixed standard data and voice packages of up to 2 Mbps downlink / 512 kbps uplink and additional voice channels, the SAILOR 700 VSAT is Thrane & Thrane's next step in providing a cost effective, always-on broadband solution.

### new 27" widescreen ecdis approved monitor from hattel and display

The new widescreen is one of the first marine specific displays of its type to market. Hatteland Display's optical bonding, which is available as an option, ensures that the JH 27T11 offers an incredibly clear, bright and high contrast picture, making it more than suitable for a variety of critical applications.

"We are ready to start deliveries into any suitable applications, such as ECDIS, radar, conning and automation," said Lars Eriksen, Vice President, Sales & Marketing, Hatteland Display.
